

YUVAL DAVID

050-8695656 | yuvedavid@gmail.com | [linkedin](#) | [github](#)

PROFILE

Highly motivated Computer Science student with a strong academic record (GPA 92+) and hands-on experience in Full-Stack web development. Skilled in building RESTful APIs, modern frontend frameworks, and low-level programming in C/C++. Seeking a Student Software Engineering position to leverage strong analytical and practical development skills.

EXPERTISE

- Problem Solving
- Collaboration
- Analytical Thinking
- Communication Skills
- Adaptability
- Self-Learning
- Time Management

LANGUAGE

- Hebrew
- English

EDUCATION

2024- Present | B.Sc. Computer Science > Holon Institute of Technology (HIT) - Year 2 (expected graduation: 2027)

GPA: 92+ >

Core Coursework: Algorithms I, Computer Networks, Data Structures, OOP (C++), Advanced C Workshop, Probability.

2023 | Full Stack Web Development Course > HackerU Certification
Intensive program focused on modern web technologies, backend architecture, and database management.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, TypeScript, HTML5, CSS/Sass.
- **Frameworks & Libraries:** React.js, Redux, Node.js, Express, Bootstrap, jQuery.
- **Databases & Tools:** MongoDB, REST APIs, Git/GitHub, VS Code, Visual Studio, Chrome DevTools.

PROJECTS

Final Project – Full-Stack Web Application [AMOUR – online store] > Developed a complete responsive web application designed for online clothing store.

- Built robust RESTful APIs using Node.js and Express to handle complex server-side logic and database operations (CRUD).
- Implemented secure user authentication and authorization using JSON Web Tokens (JWT) and HTTP-only cookies.
- Managed complex application state on the frontend using React and Redux.
- **Stack:** React, Redux, Node.js, Express, MongoDB, Bootstrap.
- [GitHub](#): [FullStack GitHub](#)

Interactive Web Applications Portfolio >

- Developed a collection of interactive applications utilizing JavaScript, TypeScript, and DOM manipulation, applying advanced OOP principles.
- Integrated public REST APIs and managed asynchronous data fetching and state handling.
- Code & Demo: [Live Demo](#) | [JS GitHub](#) | [React GitHub](#)

Academic Engineering Projects (HIT) > Developed memory-efficient software solutions in C/C++, including custom implementations of dynamic data structures (Linked Lists, Binary Trees).

- Handled low-level file processing (text and binary files) and memory management configurations.

MILITARY SERVICE & RESERVE DUTY

2020 – 2022 | Operations Sergeant & Executive Assistant > Northern Brigade, IDF

- Coordinated real-time operations and critical communications under high-pressure, fast-paced environments.
- Managed cross-functional coordination between multiple teams and senior personnel.

- **2023 – Present | Reserve Duty – Division 98** > Active combat-support reserve duty, executing operational coordination in emergency situations.
